

Environmental Technicians/Monitors

Seven Generations Environmental Services Ltd. (SGES) is a 100% Aboriginal owned and operated environmental consulting firm dedicated to working with all levels of government and the private sector to deliver environmental services including environmental monitoring and related land restoration activities.

Throughout the Lower Mainland, to the Fraser Valley and beyond you will be involved in various projects providing environmental monitoring, wildlife surveys, restoration activities, fish salvages, hydroseeding and other technical environmental work.

Responsibilities

SGES is looking for candidates who have a technical background and who views this position, as a first step in a career in the environmental industry. Project work will focus principally in the areas of fish sampling and salvage, environmental monitoring, erosion, and sediment control inspection, wildlife surveys and land restoration/reclamation activities.

Based on experience and aptitude, the successful candidate would be given opportunities for expanded duties and career growth within our environmental services group.

Requirements

The ideal candidate will have experience in environmental monitoring, erosion and sediment control practices, fish habitat assessments, riparian area regulation assessments, fish sampling, fish and amphibian salvages, and land restoration. The candidate should also have working knowledge of fish identification, and riparian plant identification. Previous experience working with Species at Risk is considered an asset.

Candidates must have strong interpersonal skills. Strong verbal communication and technical writing skills are particularly important.

Mandatory qualifications

- Post-secondary diploma or degree in biology, environmental studies or related discipline; or environmental technical certificate, with 1-3 years' relevant field experience;
- Strong computer skills are essential (e.g. MS Office)
- Class 5 driver's license valid in B.C.
- Drivers Abstract

Additional desirable qualifications

- Electrofishing certification
- Level 1 First Aid and Transportation Endorsement
- Erosion and sediment control inspection/installation experience/training
- Construction Environmental Monitoring experience/training
- WHMIS Certificate preferred

What we're looking for

- Organized and able to work both independently and as part of a project team;
- Demonstrated interpersonal and public outreach capabilities;
- Understanding of the Health and Safety Act; and other relevant legislation and policies;
- Computer literate with database and GIS skills is an asset

Type of Position: Casual On-call

Interested candidates must submit a resume and cover letter to:

Email: info@sges.ca

Attention: Tana Mussell- General Manager
